Overview	The oil and gas industry uses many unique contractual arrangements to explore for, develop, produce, and market oil and gas. Land professionals must understand not only what makes a contract legally enforceable and the defenses thereto, they must have a working understanding of the most widely used contracts in the industry including Area of Mutual Interest (AMI) Agreements, Farm-ins/Farm-outs, Trades and Promotes, Support Agreements and the Joint Operating Agreement (JOA). This module also focuses on the critical role of assignments that occur as a result of joint ownership agreements.
